THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. 9. ☐ Other _____.

1. **Claims 10-12 and 14-20** are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claim 10, the prior art of record fails to anticipate or make obvious a method for redundant call control comprising: "... transmitting call setup signals between the BSC and an originating MSC and between the originating MSC and a gateway-MSC (G-MSC) by way of a first signaling gateway, and [transmitting call setup signals] between the G-MSC and a Home Location Register (HLR), ... by way of a second signaling gateway, to determine a destination MSC; ... when the destination MSC fails, routing call setup signals received from the G-MSC to a backup MSC and establishing a call connection between the backup MSC and the originating MSC; when the G-MSC fails, routing the call setup signals received for the G-MSC to a backup G-MSC and establishing a call connection between the backup G-MSC and the originating MSC; and establishing a call connection between the calling party mobile station and a called party mobile station using at least one of the backup G-MSC and the backup MSC."

With regard to claim 14, the prior art of record fails to anticipate or make obvious a cellular network comprising: "a Gateway Mobile Switching Center (G-MSC) for establishing call connections; a Home Location Register (HLR) for providing location information to the G-MSC as a part of call setup; a first signaling gateway ... coupled between each of a plurality of MSCs and the G-MSC; a second signaling gateway ...

coupled between the G-MSC and the HLR; wherein the HLR identifies a destination MSC for a call being setup based upon a called party mobile station location record maintained in the HLR and transmits call signaling messages to the second signaling gateway; wherein the second signaling gateway redirects the call signaling messages to a first backup G-MSC upon detecting that the G-MSC is in an inactive state; and wherein the first signaling gateway redirects the call signaling messages to a second backup G-MSC upon detecting that the G-MSC is in an inactive state."

With regard to claim 19, the prior art of record fails to anticipate or make obvious a signaling gateway comprising: "... logic for: ... if the destination switching element is in an inactive state, determining a first-backup switching element; ... determining a second backup switching element and forwarding a first group of call signaling messages to the first backup switching element and forwarding a second group of call signaling messages to the second backup switching element."

Xu et al. (US 2007/0165516) and Feng (US 2007/0109960) discloses a gateway servicing two call servers in order to provide for reliability of a telecommunication network entity and protection against call server failures respectively. Both Xu and Feng also disclose BSS and BSC respectively for mobile communication. Xu discusses different signaling messages while Feng further discloses HLR. However, the effective dates for both Xu and Feng do not make these references good art rejections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
